

THE UNKNOWN MINING DISTRICT

IMPORTANT STRIKE BETWEEN LONE MOUNTAIN AND SILVER PEAK.

There has been an important strike out on the flats between Lone Mountain and Silver Peak, which gives promise of another district, which will have for its distributing point, Tonopah. There was a rush to the new discovery, but it was done in a quiet way, and without exciting much disturbance, but there have been a great many locations, and the location work done on nearly all the claims.

J. E. Lucey, miner and prospector, was the man who made the initial location, and those who came after him named the district the Unknown mining district, for the reason that they did not know just where it was situated.

"The camp is to the north of the ground of the Interstate Mining Company," said Mr. Lucey. "and I went in there first in last June. I had been working on the Interstate and when it closed down I went out to look over this property. I found that it had been neglected in all the rushes, for there was not a monument anywhere. The zone has now been taken up for a distance of eight miles, and there are some very good showings.

"The Paymaster mine, which is ten miles east of Blair, is on the southeastern end of the zone, and the Pittsburgh Silver Queen is about a mile and a quarter from my claims, the ground between us all being taken up. The formation seems to be in porphyry and lime, with quartz. The values are in copper and gold. Joe Brackett has had some fine showings on the Pittsburgh Silver Queen. The smallest assay I have seen from there is \$5.30, and from that they have gone as high as \$455. He has also got some very high percentages in copper.

"The Interstate is also a very good property. There is any amount of low grade ore, and there is some which has gone as high as \$475 a ton. They have a ledge there which is 200 feet wide and which will assay from \$2 to \$20 a ton. The country is very promising and I am going back as soon as possible and finish up my location work. There are still quite a few people there, and I think that next spring will see a considerable movement."

TONOPAH IS TO HAVE GUN CLUB

Tonopah is going to have a gun club. There are a number of sportively inclined men in this camp who are fond of the gun, and who are crack shots. Several of these have got together, and decided to have a gun club. There will be a meeting of the sportsmen on Sunday next, at a time and place which will be announced later.

PERSONAL MENTION

Justice of the Peace Chambers of Manhattan was in the city yesterday. R. E. Tilden, the surveyor, has returned from a trip to his home in Louisiana.

Deputy U. S. Marshal Stearns, who was here for a few days, left for Reno last night.

Jack Stebbins of Round Mountain, after spending several days in the city, returned home this morning.

Victor R. Peterson, telegraph operator at the railroad depot, left yesterday morning for his home in Los Angeles.

J. S. Roberts, assistant superintendent of the Railway Mail Service in San Francisco, was one of the passengers on the first train out for the coast yesterday.

B. J. Reilly, Joe Reilly of the lease that made the Florence mine famous and kept Goldfield going two years ago, came over yesterday from the city across the desert.

Thomas E. Edwards, who was one of the original owners in the famous Montgomery Shoshone mine, came in yesterday, and will be here for the next few days. Mr. Edwards recently lost his wife, who was, with him, one of the early settlers in this camp. She had many friends here, in whose esteem she held the highest place.

Frank Schwartz of Manhattan, was in town yesterday and speaks highly of the developments that are going on there. Mr. Schwartz has mined in Nome and Dawson, but he likes Manhattan better than any of the Alaskan camps. He says that things are very lively in the northern camp as far as work goes, and that there is not an idle man in the camp.

CLOSE DEAL AT BATTLE MOUNTAIN

LOCAL PEOPLE, TOGETHER WITH PHILADELPHIA CAPITALIST, PURCHASE MINE.

The firm of Langley, Trimble & Co., together with J. J. Rattigan of Philadelphia, have just concluded the purchase of the Pedro group of claims near Battle Mountain. Mr. Trimble and Mr. Rattigan returned yesterday from Battle Mountain, after completing the deal, and expressed themselves as very well satisfied with their purchase.

Before completing the purchase, they had secured an option on the property and had it thoroughly examined and sampled by G. M. Corns, the well known mining expert. That gentleman has examined many properties in this section of the country and this is the first that he has found upon which he could give his unqualified approval. It is a gold proposition, mainly, and the assays are most satisfactory.

There are, according to the report of Mr. Corns, twenty feet of sulphide ore, which averages \$164.20 a ton. After concentrating this the result was \$154.40, leaving \$9.80.

The work that has been done on the property comprises a tunnel, which has been driven in for a distance of 275 feet, and 75 feet of this is in the ore. At a distance of 18 feet in, a crosscut drift has been run for eighteen feet, and it is from this that the assays have been taken. The report says that for the first four feet the average is \$1 a ton, with a width of six feet; for the next eight feet, with a width of eight feet, \$3.60; for the next ten feet, next to the hanging wall, the average is \$31.30. All the values are in gold, no assays being taken for silver.

The sulphide ores that occur in 20 feet of the crosscut drift, the report continues, on the hanging wall side, average \$164.20. The average of five feet of the sulphides on the footwall side is \$34.60; and of 12 feet in the east drift on the vein from the crosscut drift, eight feet wide, \$9.60.

There were more samples than these taken by Expert Corns, all of which were checked by W. F. Norris, and showed even higher values. Then Mr. Trimble took his own samples, and they were most satisfactory. The vein is a contact of two formations, one of porphyry alternated rhyolite, and the other of quartz trachyte, with a vein filling of very siliceous porphyritic quartz, carrying a high grade of iron sulphide, which will run at present about fifty per cent of the total values in free gold.

The trend of the vein is north of east and south of west, dipping to the north thirty degrees. The vein is very prominently exposed on the surface. There is plenty of water on the ground for the operation of a twenty-stamp mill, and there is a fine spring, besides, for domestic purposes. Mr. Corns, in his report, says that the ore can be treated to 90 or 95 per cent of its value by amalgamation, concentrating and cyaniding, as the iron sulphide at present is absolutely free of refractory mineral.

"We will proceed with the development of the property as fast as possible," said Mr. Trimble, last night, "and a ten thousand dollar plant will be installed, with a capacity of sinking a thousand feet, with power for pumping and the machine drills."

Mr. Rattigan, who is interested with the Langley, Trimble Company in the deal, will leave for Philadelphia tomorrow, in company with Mr. Corns, and he says that he will have no difficulty in raising fifty thousand dollars to push operations. He is, himself, a heavy stockholder in the Monongahela Trust Company, and is a director of the First National Bank at Homestead.

REDUCED BAIL FOR ETNA COLE

Etta Cole, the woman who was indicted with Frank Hart for grand larceny, in having robbed Mrs. Kirk of her jewels, had her bail reduced yesterday from \$5000 to \$1000, by consent of District Attorney Pat McCarran. Hart was found guilty, and is now serving his sentence of ten years in the State penitentiary. The jury disagreed in the case of the Cole woman.

It is a well known fact that persons living in the Pine forests do not suffer from kidney diseases. One dose of Pineules at night usually relieves backache. 30 days' treatment \$1.00. Your money refunded if not satisfied. Sold by Tonopah Drug Co.

Don't forget the Bonanza's up to date blindness.

SPECIAL CAR ON WAY TO UBEHEBE

LONDON CAPITALISTS AND EASTERN FINANCIERS WILL BE HERE THIS MONTH.

There are more people coming to view the wonders of Ubehebe, the copper country, which has been developed by John Salsberry to such an extent that it has become world famous.

They are coming this time from London, and from the East. There will be another special car, filled with the visitors and investors, reach here on or about the twentieth of this month, chaperoned by Frank Peard and H. L. Merry. The party will be designated as the Merry-Peard party, and for the majority of the crowd it will be their first experience on the desert.

Frank Peard is a banker and broker of Baltimore, and he was here about two months ago. He went to Ubehebe to look over the ground, with a view of handling the bonds of the contemplated road from Bonnie Claire into Ubehebe, and he was so charmed with the prospects that he took the entire bond issue of a million dollars. Upon his return to Tonopah, he received a wire from his house, requesting his immediate return, as it was necessary for him to go to Paris. He told the Bonanza at the time that the Ubehebe mines of Mr. Salsberry were the most attractive investment he had seen in this or any other country. He said that he would dispose of the bonds without any trouble, and that he would interest capital on the other side of the water, while on his trip abroad.

That he has done this, seems most probable, in view of the fact that he is returning with a number of London people. The party from the East will comprise George T. Gamble, of the Roxbury Distilling Company; Mr. Hitchins of Frostburg, Va.; general passenger and freight agent of the Cumberland and Piedmont Railway Co.; Nathaniel Hilbert of Boise City, Va.; Mr. McAllister, a prominent optician of Baltimore; Mr. Young, widely known in electric circles in Pennsylvania, and Mr. Weadock, an attorney of Saginaw, Mich. Besides these, there will be eight gentlemen from abroad.

O. A. Turner, who bought the Mizpah mine for Cohen, is another who will be a visitor to Ubehebe before the end of the month. Mr. Turner has never got over his love for this country, and he should always be proud of his judgment in the purchase for the Tonopah Mining Company. He is a thorough believer in the rest of the country, and he is now after copper. He has heard much of the Ubehebe, as who, indeed, has not, who is interested in mining, and particularly in copper mining, the world over. He, like all the others, is going to the district to verify for himself all that he has heard. If he is like the rest of the experts who have visited Mr. Salsberry's domain, he will not only verify what he has heard, but will see more than ever he imagined. From all accounts, it is one of the greatest copper mining camps in the world.

ARE AWAITING RAILROAD'S ARRIVAL

W. E. Johnson, cashier of the Greenwater Banking Corporation, is here from Greenwater. He says that the camp is quiet at present, but not any more so than other places at this time of year.

"There is one thing to be said about Greenwater," said he, "and that is, that there has been nothing demonstrated in the camp's disfavor. There is a good show there, if enough work is done, for they may have to go to considerable depth."

"The Greenwater and Death Valley Company has the largest force of men at work of any of the companies. The Saratoga Company is working; so is the Furnace Creek, and there are several others whose names escape me. The railroad is completed as near as the Lila C. the greatest borax mine in the world, which makes it only twenty-one miles from Greenwater. The town is quiet now, but there will be a big difference when the railroad gets in there."

Journals, cash books and ledgers—just the thing the merchant needs—best that can be made. For sale at the Bonanza office.

DULUTH BROKER TALKS TONOPAH

After an absence of two months in the mining districts of California and Nevada, John L. Morrison, a mining broker who makes Duluth his headquarters, has returned to the city for a short stay.

"The west appears to be in normal condition and looks good to me," said Mr. Morrison to the News Tribune. "In Nevada, mining is moving right along. The 'wildcats' have had a hard time of it this summer and their disappearance is giving a healthy tone to the mining business in the sage brush State."

"Goldfield and Tonopah, for example, are quiet but actual mining is going on as never before. All labor troubles have been settled and I look for a prosperous winter out there. Tonopah has passed the speculative stage to a high degree and actual mine making and ore production now have the upper hand. Some immense reduction plants are under way and in prospect for that camp."

"Goldfield has been very quiet this summer as to speculation, but the huge bonanza mines have been making good with their marvelously rich ores and all who wish to work have had it in that camp."

"Building in Goldfield this summer has been very expensive. A \$300,000 hotel is nearly completed. Large stone business blocks are going up and the local people certainly have confidence in the mines and the future of that camp. Local money is back of most of the building improvements. I think that wildcats and speculators will have slim picking there this winter, but legitimate mining business will progress finely."—Duluth News Tribune.

ATTORNEY WALTER COLE IS MARRIED

OAKLAND, Oct. 8.—The marriage of Walter Cole, of Tonopah, and Miss Winifred Burdge took place Monday evening at the residence of the bride's sister, Mrs. Bernard P. Miller, in East Oakland. Although it is one of the really interesting weddings of the month, it was quite simply celebrated, with only the members of the two families and Mr. and Mrs. F. M. Smith as guests, about twenty-five of the closest friends in all. The ceremony was read by Rev. Charles R. Brown, pastor of the First Congregational church, the bride party taking its place on the broad platform in the reception hall. Miss Mary Wilson was Miss Burdge's only attendant. Percy Norwood assisted the bridegroom.

Mr. Cole and his bride will spend their honeymoon in Mendocino county, returning to Oakland before going to Tonopah, where they will make their home.

The bride is an unusually attractive girl, unaffected and charming. She was one of the group of girls who made Arbor villa, the home of F. M. Smith, so full of life. Mr. Cole is a graduate of the University of Michigan's law department. He is a member of the Sigma Nu fraternity. At one time he was registered in the University of California. Mr. Cole comes of a prominent family in Santa Barbara.

Mothers with little children need no longer fear croup, colds or whooping cough. Bees Laxative Cough Syrup tastes good. It works off the cold through the bowels, clears the head. Guaranteed. Sold by Tonopah Drug Co.

HURT BY TEAM RUNNING AWAY

John Bogonitch, driver of a wagon, was the victim of a runaway yesterday afternoon. He was up at the Montana Tonopah mine, when the horse took fright at a freight train. It was so long since the animal had heard a locomotive whistle that he didn't know what to make of it, so he cut and run. Bogonitch was thrown out and badly bruised, but none of his bones were broken. He was taken to the Miners' Hospital.

Corporation seats of every description furnished on the shortest notice by the Bonanza.
